NEEIL NANDAL

AI/ML & LLM Engineer · Data Scientist · Decision Scientist

Leiden, Netherlands | neeil.nandal@gmail.com | linkedin.com/in/neeilnandal | github.com/neeilnandal

Orientation Year Permit (Zoekjaar): Valid & unrestricted work rights in the Netherlands through November 2027

IND Highly Skilled Migrant Visa for future sponsorships: Eligible

PROFILE

MSc Computer Science & AI graduate (Leiden University) who builds models that hold up outside the notebook: measured, explainable and tied to a decision. My thesis evaluated four LLMs in a rule-bound environment, where Chain-of-Thought prompting and a validation layer cut illegal-move rates to 2–4%. In industry I have shipped anomaly detection, a support chatbot resolving about 50% of tier-one queries, and customer segmentation contributing to a 30% conversion uplift.

EDUCATION

MSc Computer Science, Artificial Intelligence track | Leiden University, NL **Oct 2026**

- **Thesis:** Analysing the intelligence of AI LLMs in the game of Chess (May 2026). Evaluated Qwen 2.5, Llama 3.2, DeepSeek-R1 and Mistral 7B with python-chess as a rule-checking referee; Chain-of-Thought prompting cut illegal-move rates from 11–16% to 2–4%
- **Coursework:** Advanced Data Management for Data Analysis; Multicriteria Optimization and Decision Analysis; Automated Machine Learning; Introduction to Deep Learning; Reinforcement Learning; Evolutionary Algorithms; Seminar Trustworthy Artificial Intelligence

BTech Data Science Engineering | Manipal Institute of Technology, India **Jul 2024**

Machine Learning; Statistical Analysis; Data Mining; Big Data; NLP; Deep Learning

EXPERIENCE

Data Science Intern | Nfilade Security Solutions, India **Feb 2024 – Aug 2024**

- Trained a deep-autoencoder anomaly detector (TensorFlow, Keras), reducing detected financial fraud incidents for banking clients by an estimated 15%
- Prototyped a network-traffic anomaly detector identifying malicious patterns with more than 90% accuracy, feeding internal threat-intelligence workflows
- Built a Flask API alert service that notifies stakeholders of fraud signals in real time, cutting incident response time by about 2 hours
- Built Mitra, a Botpress support chatbot with human escalation; chose low-code over a custom NLP stack for the narrow scope. Resolved about 50% of tier-one queries

Data Analyst Intern | ShopCultModern.com, India **Jun 2023 – Aug 2023**

- Segmented 20,000+ customers with K-means clustering, contributing to a 30% conversion uplift for selected segments
- Built three Tableau dashboards for sales, margin and inventory, helping leadership reduce stockouts by about 10%
- Worked with cross-functional teams on product listings, cutting cart abandonment by 20% during promotions

PROJECTS

Human-in-the-Loop Q&A Evaluator | Python, Streamlit

- Deployed a review tool that tags AI-generated answers by failure type (accuracy, relevance, coherence, bias, completeness) to show where models fail most

MODA Cargo Optimiser | Python, pymoo (NSGA-II)

- Built a constrained multi-objective optimiser for container loading that presents Pareto trade-offs and maps each operational priority to a recommended plan

Deep Learning Experiments | TensorFlow, Keras

- Compared MLP and CNN designs (Fashion-MNIST CNN 90.81%); for clock-time prediction, a circular label encoding cut mean error to 13.43 minutes, versus 160+ minutes for other encodings

Cargo Data Intake Lab | Python, unittest

- Built an end-to-end tested pipeline that maps client files to one schema and splits records into accepted and rejected with row-level reasons; 10/10 unit tests passing

SKILLS

Programming: Python (primary), SQL, R

Machine Learning: scikit-learn, XGBoost, TensorFlow, Keras, PyTorch; anomaly detection, clustering, experiment design

LLMs & GenAI: LLM evaluation, prompt engineering (Chain-of-Thought), RAG, LangChain, human-in-the-loop review

Decision Science: multi-objective optimisation (NSGA-II), Pareto analysis, A/B testing, KPI tracking

Data & Platforms: Pandas, NumPy, ETL, data-quality validation, PostgreSQL, MySQL; Databricks (Genie, SQL editor, notebooks); Streamlit, Flask, Git; AWS, Azure, GCP (coursework)

BI: Tableau, Power BI

Certifications: LangChain for LLM Application Development (DeepLearning.AI); Developing RAG Agents for LLMs (NVIDIA); Professional Scrum Master I (PSM I, Scrum.org)

LANGUAGES

English (fluent); Dutch (A1, actively learning; A2 targeted by end-November 2026)
